Target Exploration

Target Exploration

Target Exploration Consultants was established in 1990 in Kensington, London, England by a petroleum geologist Muhammad Wijdan Ibrahim, Ph.D. in association with a group of experienced Geologist, Geophysicists, Stratigraphers, Structural Geologists, Sedimentologists; Petrophysicists, Petroleum Geochemists, Reservoir Engineers, Palynologists and other experts consultants with proven hydrocarbon exploration and production track records, quality research and technical services in oil companies, academia and research institutes.

Target Exploration Consultants is a multidisciplinary exploration and production consulting team of Petroleum Earth Scientists and Petroleum Engineers dedicated to providing the national and multinational oil and gas industry with exclusive and non-exclusive E&P research, innovative technical solutions, high standard technical studies and services.

Target Exploration Consulting team has been assisting the oil and gas industry since 1990 in exploring for new oil and gas traps, evaluating and producing oil and gas reservoirs, in prospecting for hydrocarbons in fractured and nonconventional reservoir rocks, and in rediscovering economical hydrocarbons missed, bypassed, un-reached or underestimated by old discovery and/or "un-discovery wells".

Target Exploration holds an annual MENA O&G Conference (Middle East and North Africa Oil and Gas Conference) and an occasional IPC (Iraqi Petroleum Conference) at the Imperial College of London.
