

Target Exploration

Energy Geosciences Research & Development

Target Exploration

A London-based multidisciplinary Petroleum Geosciences Exploration, Production and R&D Consultancy. Established in 1990, and after 25 years of consulting and R&D solutions Target Exploration Consultants became a UK-Registered Limited Company No. 9880383 in 2015.

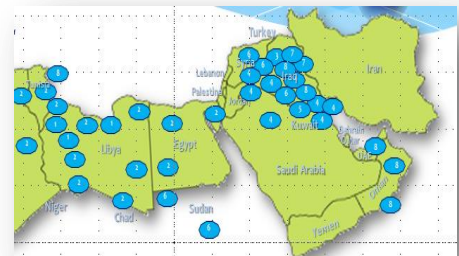

Consulting

Target Exploration Consultants has for more than 25 years been providing the oil industry with E&P geosciences consulting services and R&D solutions to Petroleum E&P challenges at all stages of oil and gas field's lifecycles, as well as Geohazards, Geothermal and Solar Energy Research.

Experiences

Target ECL accumulated more than 25 years of hands-on experiences, R&D solutions and produced exploration reports on African, American and European basins, and many reports and databases on oil & gas fields, concessions and basins in several MENA countries.

Innovations

Target Exploration staff and associate consultants are routine users of standard petroleum industry software. However, Target Exploration Consultants develops in-house Petroleum exploration, Geothermal exploration, and concession ranking software whenever standard software doesn't deliver the desired results.

Library

Target Exploration has an extensive library of geosciences research papers, non- and exclusive reports, conference proceedings, well-logs, tops, cores and cuttings.

Target Exploration

Energy Geosciences Research & Development

Conferences

Target Exploration Consultants has been organising the *Iraqi Petroleum Conferences (IPC)* since 1999, the *Middle East and North Africa Oil and Gas Conferences (MENA Oil & Gas Conferences)* since 2000, and started organising *MENA Energy Workshops* in 2018.

Courses

Target Exploration organises regular courses on Petroleum Engineering, Petroleum Geosciences, and Petroleum Geology & Typical Fields of MENA Countries. Some country review courses are followed on by a field-trip to source, reservoir and seal rock-exposures of the petroleum systems deliberated in the preceding course.

Fieldtrips

Target Exploration organises cost-effective, led by local expert geological fieldtrips to Precambrian, Paleozoic, Mesozoic and Cenozoic source, reservoir and cap rock exposures of MENA petroleum systems. Our Field Guidebooks and rock samples are prized by MENA's Petroleum Explorationists.

Reports

Target ECL has >50 non-exclusive basin, concession, field evaluation reports, and mature basin-rejuvenation studies using Geothermal Gradient Anomalies of proven HC traps to rank the probabilities of missed, by-passed or unreached traps by old "un-discovery" wells P&A as dry holes in early exploration days of the basin.

Clients

In >25 consulting years, list includes: AMOCO, CHEVRON, CONOCO, DNO, HYDRO, JAPEX, KNOC (ME), MAERSK OIL, MOBIL OIL, OCEP, PETRONAS, ROC OIL, UNOCAL.
