

Target's Fieldtrip Seminars

Target Exploration organised the first Target's Fieldtrips to the Lower Paleozoic exposures in Jordan in 1997, and carried out this tradition ever since. Key benefits of our fieldtrips are: Our MENA fieldtrips are cost-effective as trips are led by local expert field geologists. We use local touristic and/or academic transports and boarding facilities. The Fieldtrip Guidebooks are valuable sources of geological knowledge. Participant may collect rock samples, and take photographs of the exposed Precambrian, Cambrian, Mesozoic and Cenozoic source, reservoir and cap rocks of the visited exposed stratigraphic sections.
