Target Exploration

Energy Geosciences Research & Development

Our Experience

Ever since foundation in 1990 *Target Exploration* has been providing national and international petroleum companies with geosciences consulting services, technical research and R&D solutions for petroleum exploration, oil and gas fields development and production, as well as geothermal exploration, and HSE challenges in exploring, developing and operating in desert environment with regular sand and dust storms.

Target Exploration produced a list of non-exclusive reports, studies, reviews and evaluations of possible, probable and proven hydrocarbon resources of basins, countries, concessions, and petroleum reservoirs. Indeed, *Target Exploration's* reports may have most of the due diligence research needed for your new venture.

Target Exploration

Energy Geosciences Research & Development

Our Products

Target Exploration produced numerous exclusive and non-exclusive reports on dry-holes post-mortems, HCs potential of countries, concessions and oil and gas fields evaluations using industry standard and in-house developed software for concessions ranking, and geothermal exploration for possible and probable missed and bypassed oil and gas traps drilled by "un-discovery wells" and badged as dry-holes.

Target Exploration has been organising the Middle East and North Africa (MENA) Oil and Gas Conferences, the Iraqi Petroleum Conferences (IPC), and providing exclusive and none-exclusive country-specific petroleum geology and petroleum exploration Courses and Field-trips in the UK and MENA countries.
